

WearWise

A calm, confident way to *decide what to wear* — every morning.

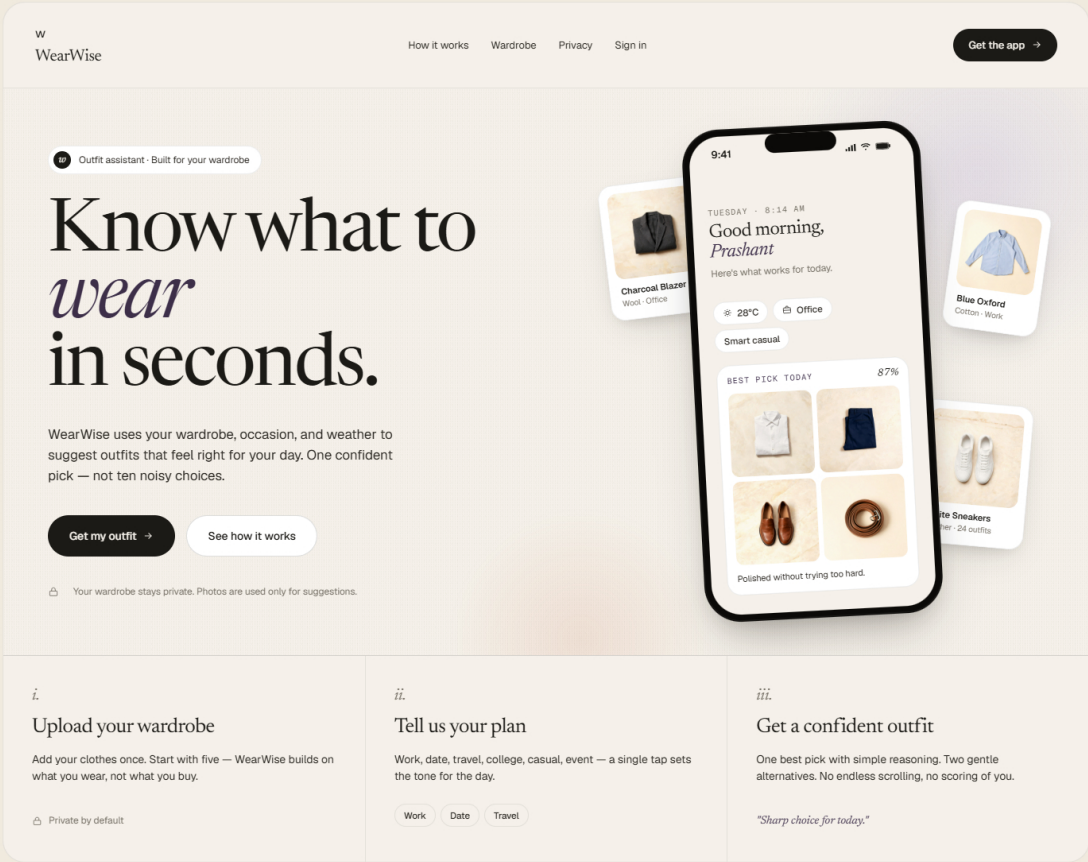

Mobile app concept, v1. Landing, onboarding, daily dashboard, outfit results, wardrobe, capture flow, occasion picker, feedback — designed as one quiet, premium system.

01 / LANDING

The first impression

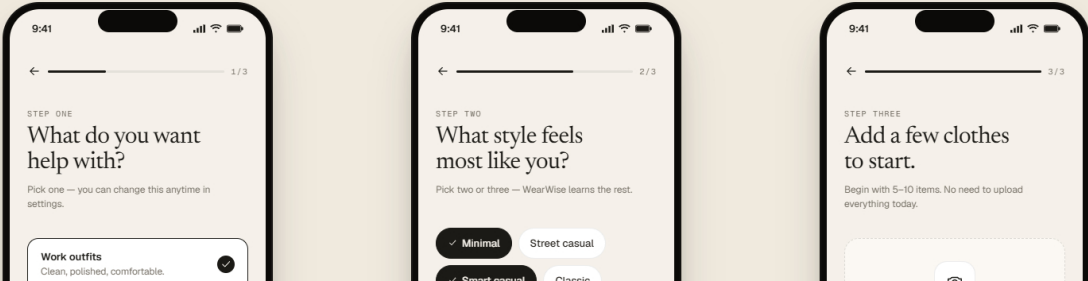

Editorial typography sets confidence and taste. The phone leans into a quiet composition of three floating outfit cards — a hint of the daily output without overwhelming.

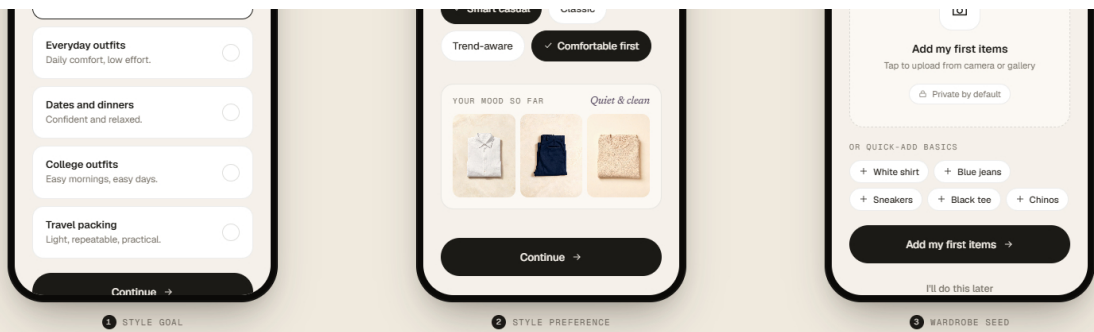

02 / ONBOARDING

Three quiet questions

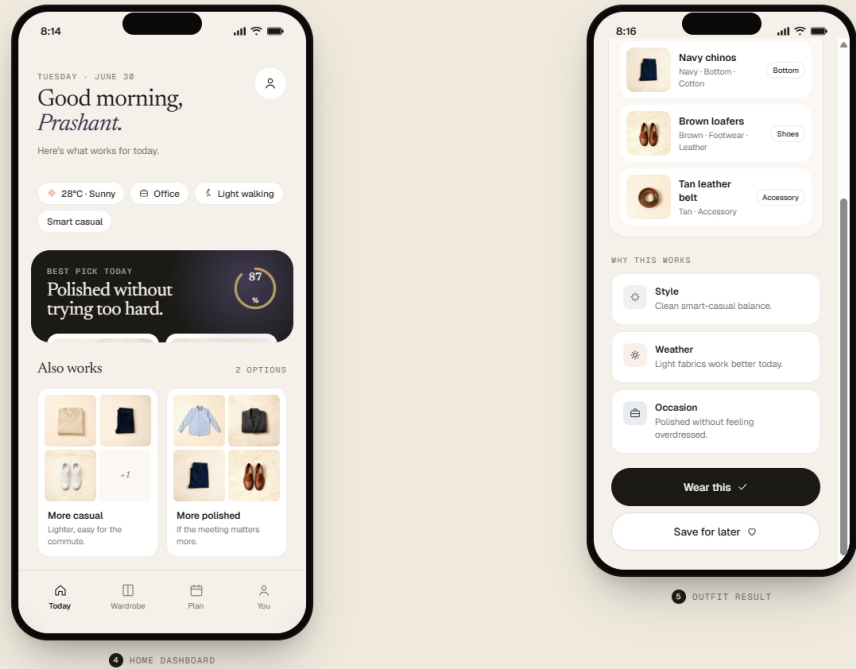

Goal, style, wardrobe seed. No forms, no scoring, no pressure — large tap targets and warm language guide the user through in under a minute.

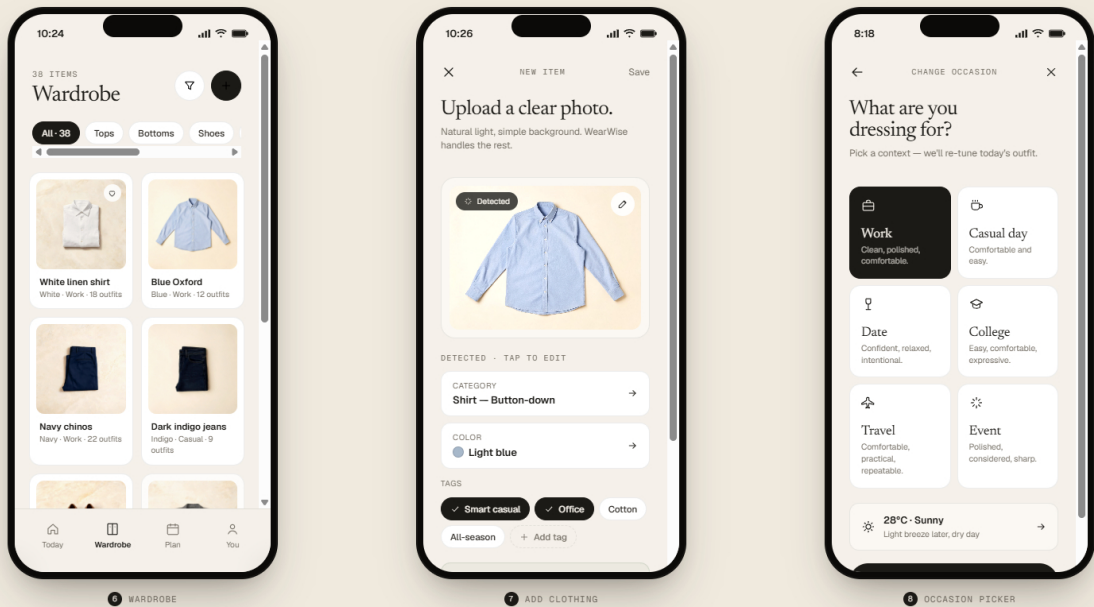

Home & outfit result

The emotional center of the app. One hero outfit, one clear style match, three short reasons — never ten loud ones.

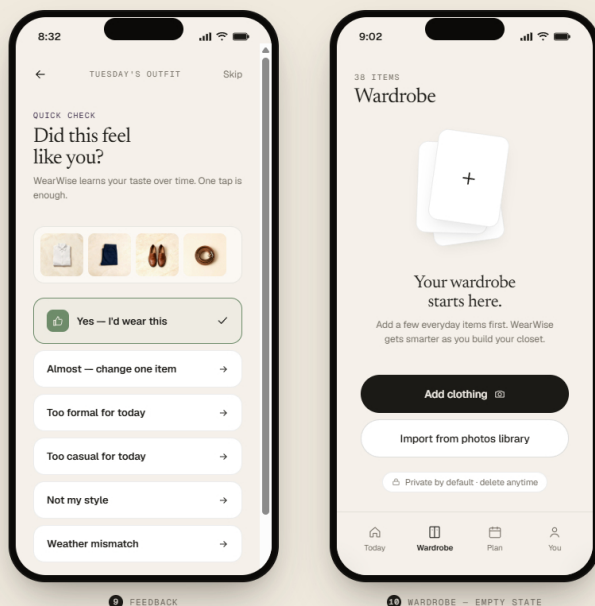

Your closet, organized

A satisfying, library-style grid of what you already own. Capture is fast — large camera area, AI fills the details, every field stays editable.

Feedback, gently

After a user accepts or rejects an outfit, one calm question — taste improves quietly in the background, never as a quiz.

0 FEEDBACK

10 WARDROBE — EMPTY STATE

Components & language

A small, deliberate kit: warm neutrals, deep plum primary, an editorial serif for confidence, and a clean sans for clarity.
